**Waste Matters**

## Need for attending the training Programme:

Industrialization, economic growth and urban development cause various environmental issues and generate waste. Today, industrialization and population growth are leading concerns for rampant pollution in India. Therefore, we cannot afford to generate wastes or dispose of wastes through unscientific means and create pollution. The wastes so generated apply to all kinds of waste i.e. those generated in offices, industries and service sector etc.

We need to be sensitized and made understood that environment and economic growth can go hand in hand, by utilizing our resources effectively and minimizing wastes and doing our bit for Pollution Prevention. This training programme is designed to train the participants on the environmental issues currently faced by the companies / organizations / institutes, and the means / tools to tackle these issues. The latest environmental solutions to companies to improve upon their environmental performance and bring about enhanced monetary savings, improved environmental performance and improved productivity to their respective companies/organization/institutes, would be covered. The programme is in line with Zero Defect and Zero Effect, Make in India programme launched by the Government of India. It will also help in achieving the objective of Swacch Bharat Mission together with sustainable growth.

This will go a long way in improving the environmental performance of the country.
