GOVERNMENT OF MAHARASHTRA
State Project Directorate
Rashtriya Uchchatar Shiksha Abhiyan (RUSA)
Department of Higher & Technical Education

Manisha Verma, I.A.S.
State Project Director

Date: 12th July 2016

Dear Sir,

India is a country of young minds, and various innovative ideas based on research are originating from them. These ideas are getting triggered by the exposure to the connected world and access to modern knowledge and skills in various domains. These ideas need to be heard, developed and nurtured for Nation Building. This letter is to seek your support in providing our students a platform to share and develop their ideas with help of experts within industry and educational institutions.

RUSA Maharashtra is in the process of creating a student led online platform in collaboration with Savitribai Phule Pune University called 'कणाद' (Kan-nad) wherein, students from all academic fields can share their ideas or research in form of video or a brief synopsis.

This platform will enable students from the Universities to share their ideas and innovations with a larger audience and experts. This platform will also help universities to transfer knowledge and research to industry and society at large.

I invite your esteemed institution to participate in this initiative, making it successful so as to benefit your students, faculty members and other stakeholders. A concept note about the platform 'कणाद' is attached with this letter. I request you to kindly share this concept note with your faculty and students.

You are also requested to appoint an 'Innovation Co-ordinator' from your institute; this could be the same as the RUSA co-ordinator or any other senior person, preferably an IT expert, who is passionate for promoting innovation in education. Please share the name of the coordinator with us by 15th July on spdrusamah@gmail.com with a copy to kannad2016@gmail.com.

For any further details and queries please contact the 'कणाद' team at kannad2016@gmail.com.

Looking forward to your positive support and leadership in this endeavour,

With warm regards,

Manisha Verma

P.S.: Detailed instructions for logging on to the portal and further action items will be shared with the appointed coordinators within this week. For any assistance, please contact Neelam Pol at +91-88797 31241.

To,

The Vice Chancellors,

Dr. Babasaheb Ambedkar Marathwada University, Aurangabad;

Gondwana University, Gadchiroli;

Mumbai University;

North Maharashtra University, Jalgaon;

Rashtrasant Tukdoji Maharaj Nagpur University;

Savitribai Phule Pune University;

Shivaji University, Kolhapur;

Solapur University;

SNDT Women's University, Mumbai;

Swami Ramanand Teerth Marathwada University, Nanded;

Sant Gadge Baba Amravati University

Idea Sharing Platform for Young Minds

Various innovative ideas based on research are originating from Young Minds in our country. These ideas get triggered by our outstanding traditional knowledge, urge for quality living, and exposure to the connected world with access to modern knowledge and skills in various domains.

These potential ideas can be fuelled to strengthen the knowledge based economy and contribute towards various national development initiatives like Make in India, Smart Cities, Digital India and Start up India, Stand up India. A creation of platform for students to present potential ideas is the need of the hour!

Prospects: The proposed platform shall enable academic ecosystem to create a cohesive environment for innovation and galvanise innovation communities. This platform shall provide numerous opportunities:

- Video presentation and transformation of ideas from Young Minds into innovations,
- Contribution towards various national initiatives with sponsored innovations,
- Facilitate the reach of research papers, solutions and ideas to the society, which in turn would inspire the knowledge driven solutions for societal challenges and advancements,
- Promotion of localized solution by grass-root innovators / inventors for domestic challenges,
- Sharing experiences of unsuccessful experiments shall extend learning to innovators and promote innovation culture further.

Hence a platform for presentation of potential ideas & incubation shall help to take a functional step in integrating the best innovators of the nation.

Features: Idea Proposals on this platform can be in form of video presentations or a brief paper format. This integrated digital platform shall empower innovation ecosystems to stimulate an atmosphere of innovation through:

- **Access and Equity:** The web & mobile app presence shall ensure easy enrolment for rural innovators to leverage the opportunity with equity to the knowledge economy.
- **Reflexive:** The quick online assessments to ensure prompt feedbacks and swiftness in further development of the proposal, reducing time to market and implementation.
- **Connected Experts:** A network of experts from academic, industry, social & government ecosystems for assessment, collaboration and development of the idea proposal.
- **Multilingual Support:** For contributor and viewer support for major regional languages, thereby ensuring the participation and reach all over the nation.
- **Integrated Incubation:** For incubation, the innovators can seek investments/sponsorships for their ideas through affiliated network of incubators.

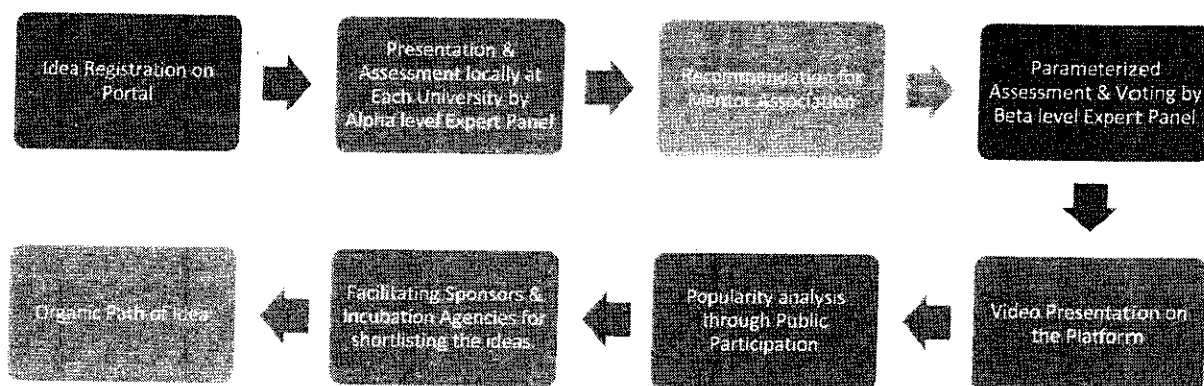

Annual Themes: The Platform shall have 'Directed innovation themes' which will be in line with the government focused areas mentioned in the union & state budgets and will be identified and reviewed every year. These themes shall provide better understanding to the aspirants about expectations and various challenges the government plans to tackle.

Idea Contributors:

1. Students shall be the major stakeholders presenting independent & in collaboration proposals with industry experts and senior citizens.
2. Senior Citizens shall be presenting collaborative research proposals with students as research associates.
3. Society at large shall get the opportunity to present research proposals & innovations by collaborating with students and industry researchers, thought leaders, and motivators.
4. Unsuccessful attempts presentations shall contribute to the platform as learning to innovators and promote innovation culture further.

Acknowledgement and appreciation: The best ideas presented on the platform shall be awarded on quarterly basis and assistance will be provided for incubation and further development. Also the participant at various university levels will be awarded e-certificates based on the criteria decided by the expert's panel.

High-Level Process:

IPR-Protection: On this platform innovator shall own intellectual property rights for the ideas, contents and the proposals generated. The platform safeguards the IPR through a robust legal framework by adopting the 'Creative Commons License'.

Benefits: After the parameterized assessment and voting by the experts, the ideas shall be presented on the platform. These quality idea proposals can evolve and transform through outcomes like products, services, problem definitions, system designs, process optimizations, employment, identification of disciplines for innovation, student motivation, knowledge based communities, innovative awareness, research findings & innovation clusters.
