Chandrapur Business Plan Competition

2019 UNNAT BHARAT ABHIYAAN

Anyone with a dream to create something new and aspires to make a difference towards the development of the district can participate in the competition.

TOPICS:

1. Agriculture

- **Monocropping:** Chandrapur has arable land, enough water supplies and ideal environmental conditions to grow diverse crops through the year, yet mono cropping is a pre-dominant technique here. Participants are expected to come up with innovative ideas to diversify the current cropping pattern to best utilize the present resources and improve output.
- **Irrigation:** Chandrapur is blessed with enough water supplies in various forms for irrigation. Participants are expected to come up with unique ideas to best utilize this water resource and present efficient and improvised irrigation methods suiting to the local geography of the district.
- **Organic farming:** Organic food has proved to be of immense importance lately in both domestic and international markets. Participants are expected to come up with innovative ideas to develop and propagate the culture of organic farming along with a systematic plan for future forward linkages.
- **Horticulture:** The topography of Chandrapur region serves as an ideal location for promoting horticulture. Participants are expected to come up with a plan to systematically propagate the concept of horticulture, its benefits and how its potential can be exploited to aid farmers with an additional source of income.
- **Others:** Apart from the above mentioned specific topics, participants can present their own Agriculture sector related innovative solutions specific to Chandrapur landscape.

2. Rural Development

- **Rural Healthcare:** The participants are expected to come up with innovative solutions to supplement the current rural health care support with modern health care facilities and technical enhancements through advanced technology to maximise outreach.
- **Rural Sanitation:** Sanitation is the key to good health. Participants are expected to come up with unique ways to increase adoption of good cleanliness habits and improve sanitation conditions in rural areas.

- **Rural Architecture and Infrastructure:** The extreme summer and average rainfall is experienced by all the rural households. From mud to semi developed houses, all bear this extremity causing casualties and impoverished lifestyle. Participants are expected to come up with simple and sustainable solutions to tackle the problems mentioned above.
- **Others:** Apart from the above mentioned specific topics, participants can present their own rural sector related innovative solutions specific to Chandrapur landscape.

3. Social Development

- **Skill Development and Education:** Imparting minimum skills to population without formal technical education to engage them in business/entrepreneurship based activities is the need of the hour. Participants are expected to come up with ideas relating to implementation of short term training programs to make this population employable and self sustainable.
- **Women Empowerment:** Involvement of women's contribution in the family income makes them confident, self sufficient and self empowered. Participants are expected to come up with ideas of new models of self help groups, micro financing institutions etc which enable empowerment of women.
- **Livelihood Generation:** New means of livelihood for rural population based on fixed resources are needed for employability generation and improving family income. Participants are expected to come up with ways and innovative ideas using which the local resources can be utilized to become a means of livelihood.
- **Good Governance:** Participants are expected to come up with ways and methods which would help the govt. towards better governance. Suggestions for novel mechanisms of awareness of govt. schemes, technologically advanced governance mechanisms along with participation of local population can also be expected.
- **Law and Order:** Healthy society is built with a fearless atmosphere for a law abiding citizen. Effective means of vigilance for the government, better intelligence sharing models, effective methodology for message distribution system in cases of emergency and natural disasters are expected from the participants.
- **Others:** Apart from the above mentioned specific topics, participants can present their own social sector related innovative solutions specific to Chandrapur landscape.

4. Environment

- **Man-Animal Conflict:** The abundance of flora and fauna across this vast landscape alongside human settlements increases the chances of human animal encounters. Participants are expected to come up with unique methods and ideas to tackle the above scenario and propose solutions for a region of collective peace and harmony for all.
- **Clean Energy:** Participants are expected to come up with innovative plans to utilize and maximise the use of renewable resources of energy in a planned, feasible and a sustainable manner.
- **Water and Air Pollution:** Chandrapur being a major industrial belt faces major challenges to cater to the quality of air and water. Participants are expected to come up with different ideas to tackle the above mentioned challenge.
- **Rain Water Harvesting:** Participants are expected to come up with feasible, cost effective methods and techniques of harnessing rain water as a potential resource.
- **Waste Management:** Participants are expected to come up with various solutions of liquid and solid waste management problems that persist in the Chandrapur district.
- **Others:** Apart from the above mentioned specific topics, participants can present their own environment related innovative solutions specific to Chandrapur landscape.

5. Industrial Development

- **Bamboo sector development:** Given the ample amount of Bamboo produce in the Chandrapur district, participants are expected to come up with innovative prospects to diversify its use and industrialize its production process.
- **Fly Ash management:** Fly ash emission from thermal plants poses a major risk to the environment and needs to be managed carefully to combat pollution. Participants are expected to come up with innovative methods for fly ash management and at the same time focus on its industrial usefulness.
- **Minor Forest Produce:** Major forest area in the district consist of diverse minor non timber forest products like Mahua, Tendu leaves, Lac etc. Participants are expected to come up with unique ways to exploit this to industrial advantage and focus on the development of this sector for the future.
- **Others:** Apart from the above mentioned specific topics, participants can present their own industry related innovative solutions specific to Chandrapur landscape.
