9. There shall be no classification of examinees successful at the Examination.
10. (i) A student successful in all the Theory papers and unsuccessful in the Dissertation shall be required to appear in Dissertation only.  
(ii) A student successful in Dissertation and unsuccessful in any Theory paper shall be required to appear in the same Theory papers only.
11. As soon as possible after the examination the C.O.E. shall publish a list of successful examinees. Only such examinees who have secured minimum pass grade as indicated in the Credit grade system shall be considered for qualifying the above said examination.
12. Notwithstanding anything to the contrary in this ordinance no person shall be admitted to an Examination under this Ordinance if he has already passed this examination or an equivalent examination of any other Statutory University.
13. Successful examinees shall on payment to the prescribed fees receive a Degree in the prescribed form signed by the Vice-Chancellor.

#### **14. Model Credit-Grade System**

As per the UGC, all the central, state and deemed universities in India, it is now mandatory to adopt credit system in place of conventional system comprising of marks and grades for all the undergraduate and post-graduate programs. The central idea of the system is that a student has to earn a prescribed minimum number of credits to fulfill the requirements of graduation. The credit system has to be designed uniformly together with a suitable continuous evaluation and a well-articulated system of grading.

### **Course Credits**

It is the unit of measurement of course works. Each course shall have an integer number of credits which reflects its weightage. One credit means one period of one hour duration.

The number of credits of a course in a given semester shall ordinarily be calculated as under:

$$\text{Number of Credits} = L + T + P/2$$

Where L, T and P represent the number of Lecture, Tutorial and Practical hours per week. The fraction is to be rounded off to next integer value. One practical/Lab. without theory of one hour equal to One Credit.

### **Grade**

It is the measure of performance quality. At the end of Year, a student is awarded a letter grade in each of his/her courses taking into account his/her performance based on the various components of evaluation i.e. on the basis of total marks (Theory + Practical +Assessment) in each theory course and (Theory + Practical) in each of the laboratory course obtained. There are eight letter grades as O,A,B,C, D,F and X as shown in **Table 2**

### **Grade Points**

The letter grades are converted to figures to indicate performance of the students. The following are the guideline steps for the computation of grade points:

- i) All evaluations of different components of a course specified in the course plan i.e. scheme shall be done in marks for each student.
- ii) The marks of various components of college assessment and university conducted examination shall be added to get total marks secured for the given course. For example, out of a total of 100 marks for theory courses and 50 mark for laboratory courses.
- iii) These letter grades are assigned numerical equivalents called Grade Points, **GP** on a 05-point scale and are correlated with percentage score of the student in the given course as shown in the **Table 2** given below.

- iv) For the given course, the adopted criteria of percentage marks given below shall then be used for the computation of grades and grade points.
- v) “F” grade stands for failure in that course examination. The course(s) in which a student has earned F-grade will be termed as back-log i.e. course(s) under ATKT. Such a student will be required to reappear in the given course examination in the supplementary examination.
- vi) “X” grade is awarded to a student who is absent in the examination or is not allowed to appear or could not appear in end semester examination (ESE)/POE in a particular subject due to any reason, though he might have undergone other components such as mid semester exams, internal evaluation, term work etc. Such a student will be required to appear in the given course in which he/she has secured X -grade in the onward term.

**Table 2: Criteria for Award of Grades**

<b>Grade</b>	<b>Percentage score, X (Theory)</b>	<b>Grade Points</b>
<b>O</b>	<b>90-100</b>	<b>10</b>
<b>A</b>	<b>80-89</b>	<b>09</b>
<b>B</b>	<b>70-79</b>	<b>08</b>
<b>C</b>	<b>60-69</b>	<b>07</b>
<b>D</b>	<b>50-59</b>	<b>06</b>
<b>F</b>	<b>0-49</b>	<b>--</b>
<b>X</b>	<b>Absent in Examination</b>	<b>---</b>

#### **D) Credit Points**

Credit points stands for performance of student in a particular course. They are product of total credits of a course and grade point secured by the student in the given course.

#### **Grade Point Average (GPA)**

It is indicative of performance of a student in the given year. The Grade Point Average for a year is obtained by adding the products of Actual Grade Points and relative weightages for different courses as shown in the scheme for respective year and dividing the total by the total credit hours for the year as illustrated below.

$$\text{GPA} = [ C_i G_i + C_{ii} G_{ii} + \dots + C_n G_n ] / ( C_i + C_{ii} + \dots + C_n )$$

Where, C – No of Credits of individual course

G – Corresponding grade point obtained in the respective course.
